WAREHOUSE MANAGEMENT
from Border States

STREAMLINE AND SIMPLIFY your warehouse processes.

Automate your warehouse processes and eliminate manual procedures, lost paperwork and data entry errors.

Use your smartphone or tablet to collect data for transactions such as material charge out, material returns, material requisition, purchase order creation and many more.

REDUCE stockouts and work interruptions

SupplyTrax™

Process transactions **FASTER**

Implementing new inventory solutions may seem like a daunting task, but we make the transition as smooth as possible. Our warehouse management solution improves inventory accuracy, reducing time spent on inventory counts and year-end inventory write offs.

HOW IT WORKS

1. Use your smartphone or tablet to collect data for daily transactions.

2. Upload information directly into your system, which automatically adds the data to the transaction.

3. Your system continues to be your one source for inventory information.

Implementation services include:

» On-site implementation and training for SupplyTrax™ app.

» Analysis of existing warehouse processes to determine best use of app.

» Ongoing technical support.

» Optional warehouse setup and labeling.

We streamline material management regardless of your supply source. For more information about automating your warehouse processes, contact us:
